

Hello my friend - Octavia the Octopus here! Cecil tells me that you are looking for help in this year's race. I have heard that the crabs are looking to slow people down but if you know their password they won't bother you. I don't know the password but I know the letters it contains. Do you want to know them? First, work out the 7 times table questions at the bottom of the sheet. If the answer appears on the sheet more than three times, write the letters that go with that answer on the line at the bottom of the page. Once you have all of the letters, copy them onto your collection card.

$7 \times 1 = \boxed{A}$

$2 \times 7 = \boxed{E}$

$3 \times 7 = \boxed{S}$

$7 \times 4 = \boxed{I}$

$7 \times 5 = \boxed{P}$

$6 \times 7 = \boxed{U}$

$7 \times 7 = \boxed{R}$

$7 \times 8 = \boxed{T}$

$9 \times 7 = \boxed{C}$

$10 \times 7 = \boxed{N}$

$11 \times 7 = \boxed{M}$

$12 \times 7 = \boxed{P}$
