

Commander T has instructed you to find out the whereabouts of one of ACE's (Associated Criminal Enterprises) agents - "The Princess". We know she is based in South America so we have dispatched agents to hunt for her. Each of our agents needs a briefcase that is full of espionage equipment. Work out the numbers that go in the empty boxes. These are the costs of the cases the agents have ordered. They will match one of the numbers under a South American country. When you have worked out all of the answers, one country will be left. You will be able to inform Commander T that "The Princess" is based there. Good luck!
