

This is China. It has the largest population in the world with 1.42 billion inhabitants - over twenty times more than the UK! Some scientists have been comparing the populations of some of China's cities. Their results are in the grid to the right, but there are two answers too many. Can you check their calculations and find out which values are incorrect?

10,180,000	21,800,000
22	7,420,000
12,820,000	70
500,000	24
440,000	5,320,000

How many more people live in Shanghai than Daqing?

What is the mean population of Yining, Daqing and Hohhot?
