

It's 21st October 1805 and HMS Victory is looking a bit forlorn after the Battle of Trafalgar. Some of her planks have been damaged - can you see the holes the French cannonballs made? The master shipwrights have worked out the size of the planks that need replacing and have written them on the paper to the right... But they got one too many! Can you work out which plank is the wrong length?

<u>PLANK SIZES</u>	
97.95m	18.6m
56.21m	41.56m
48.6m	52m
67.4m	13.8m
