

The 9 Times Table Dot to Dot

Begin at the start. Join the dots by following the numbers in the 9 times table. If you get to the ●→ symbol, follow this path - it is a tricky bit where you could go wrong! If you get to the ●↔ symbol you have to choose which paths to follow... But be careful! Not all of the paths are in the 9 times table so make sure you only follow the correct ones! If you hit a ◆ symbol then that is the end of that path. When you get to 9×10 (90) just look for 9 and start again...

Good luck!
